TurboRepo
Express
Redux
SQL
JavaFX
Spring
Cypress
Docker
Jenkins
Python

PROFESSIONAL

Tastytrade

July 2022-Present

Web Frontend Engineer

- Using primarily Svelte and SvelteKit, built a suite of web applications facilitating an end-to-end financial trading platform, from account creation and management to real-time tracking and trading of stocks, bonds, options, and crypto
- Implemented integrations with third party applications, libraries, and APIs, as well as white-labelling Tastytrade products for consumption by other corporate brands and external partners
- Participated in project planning, story writing, prioritization, and ticket sizing meetings with project managers and senior staff
- Wrote extensive unit and integration tests using Vitest and Playwright, with validated code deployed via GitHub Actions
- Delivered presentations and documentation on best practices and new technologies

Union Pacific

April 2021-July 2022

Associate Senior Application Developer

- Engaged directly with customers, business partners, and UI/UX designers to build excellent customer experiences
- Developed new applications through all stages of the software development lifecycle, from planning through to maintenance
- Worked with a team of developers to improve and maintain existing services as well as add new functionality to complex business applications hosted on private cloud resources
- Built and deployed REST and JMS microservices using Java+Spring following a Service Oriented Architecture
- Built front end applications in TypeScript with the Angular framework, the Angular Material component library, and UP's custom UI component library
- Set up and maintained Jenkins CI/CD pipelines

Techtonic

October 2020-April 2021

Software Development Apprentice

- Completed the Department of Labor-accredited Techtonic Academy software development apprenticeship program
- Spent three months in full-time, hands-on classes covering full stack development using React, Java+Spring, and MySQL
- Worked full-time for three months as a full stack developer for Techtonic using Vue, Express, and PostgreSQL
